What people are saying about Surface Solutions and owner Carl Gyska

Dear Carl,

Thank you for your call this morning to check if the work you did for me a few months ago was living up to its promise. Indeed it is - the marble in the shower looks great. I appreciate the fact that since it was a bit unusual work, you did all the research you did to make sure it was the right treatment. You are a neat and punctual man and, believe me, that is much appreciated too. I will call when I need help again.

Sincerely,
Anna Maxworthy

Surface Solutions did a tremendous job of renewing our showroom floor. The sandstone steps, limestone, and Mexican saltillo in our showroom needed professional cleaning to due to the high traffic. We mopped, vacuumed, and did what we can but the stain and dirt was implanted into the pores of the stone. They come well equipt with the industries' best machinery. They are very professional, easy to deal with, and most importantly proficient at what they do. When it comes to stone care and treatment, Surface Solutions is the first company that comes to mind.

Thank you Carl for your help.

"Surface Solutions restored my severely damaged marble countertops beautifully. I was very happy with the level of service and would recommend them to anyone."

--Jim Huggins

My wife's first response when she came home that day and walked into the kitchen was to say, "it looks better than the day it was brand new." They were efficient, professional, and easy to work with. The job they did cleaning and sealing our marble and granite countertops, and our stone floor was excellent. I will call them again when the job needs to be done.
